Exam : **2V0-31.19**

Title : Professional VMware vRealize
Automation 7.6

Vendor : VMware

Version : DEMO

NO.1 Which two types of entities can be a part of a vRealize Orchestrator package? (Choose two.)

- A. Scripting elements
- B. Inventory
- C. Logs
- D. Policy templates
- E. Configurations

Answer: B,D

NO.2 A system administrator created a tenant with URL name "fin" for the finance team. The fully qualified domain name (FQDN) of the appliance is vra.rainpole.local.

What is the correct URL to log in to the finance tenant?

- A. <https://vra.rainpole.local/vcac/org/fin>
- B. <https://vra.rainpole.local/org/finance>
- C. <https://vra.rainpole.local/vcac/org/finance>
- D. <https://vra.rainpole.local/org/fin>

Answer: A

NO.3 Which two accounts are required to configure the Health Service to run tenant tests for vRealize Automation? (Choose two.)

- A. A user account with root access to the vRealize Automation appliance.
- B. A user account with the fabric administrator role assigned.
- C. An account with the tenant administrator role assigned.
- D. An account with fabric administrator, tenant administrator and IaaS administrator roles assigned.
- E. An account with fabric administrator, infrastructure architect and tenant administrator roles assigned.

Answer: A,D

NO.4 Which two metrics providers can be used in vRealize Automation to identify underutilized virtual machines that are strong candidates for deployment reclamation of vSphere virtual machines? (Choose two.)

- A. vRealize Network Insight
- B. vRealize Automation metrics provider
- C. vRealize Log Insight
- D. vRealize Operations manager endpoint
- E. vCenter performance metrics

Answer: D,E

NO.5 Users are not able to login after installation of vRealize Automation (vRA) is complete. What is a possible cause of this issue?

- A. Time servers on all vRA servers are not synchronized.
- B. Users belong to a different business group.
- C. An approval policy is not activated.
- D. Users are not entitled to a catalog item.

Answer: A

NO.6 An architect is designing a machine blueprint containing web, application and database servers utilizing NSX-T for networking. Upon provisioning, network traffic must be automatically restricted to allow the web server to communicate only with the application server, the application server to communicate with both the web and database servers, and the database server to be blocked from communicating with the other servers.

Which methods can be used to accomplish this?

- A.** Assign an appropriate security group to the entitled items or entitled service with the entitlement.
- B.** Create or update an appropriate security group within NSX-T to include the provisioned machines.
- C.** Add an appropriate security group to the blueprint from within the Blueprint Properties, under NSX Settings.
- D.** Specify an appropriate NSX-T Existing Network and Security (NS) Group in the blueprint and assign it to each machine.

Answer: B

NO.7 An IaaS Administrator is trying to add a new vCenter endpoint. When the administrator clicks "Test Connection", the attempt fails with the following error:

```
"The specified user name and password combination is invalid for the endpoint at the specified address."
```

What is possible cause for this error?

- A.** The service account was entered in user principal name (UPN) format.
- B.** The IaaS administrator entered an incorrect vCenter fully qualified domain name (FQDN) in the vCenter address.
- C.** The service account for the vCenter endpoint has not been assigned a role in vCenter.
- D.** The service account password is using invalid special characters.

Answer: D

NO.8 Which vRealize Automation component is used to connect to an Amazon Web Services endpoint?

- A.** Guest Agent
- B.** DEM Worker
- C.** Management Agent
- D.** Proxy Agent

Answer: A
